DETAILED ACTION

Election/Restrictions

Restriction Requirement

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-22, drawn to colored dispersion, classified in class 524, subclass 86.
 - II. Claims 23-37, drawn to dye, classified in class 548, subclass 100.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require that each of the X group and the B group of the dye is substituted with at least one hydrogen bonding group, i.e. -OH, -NH₂SO₂Rb, -NHCOORb, -NHCONHRb, or -NHCOR_c. The subcombination has separate utility such as dye for inks, coatings, etc.

Art Unit: 1714

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and/or different classification, restriction for examination purposes as indicated is proper.

Election of Species

4. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species Group I

Claims 1, 3, 5, 7, 9-10, 12-13, 18-24, 26-27, and 32-37 are generic to a plurality of disclosed patentably distinct species comprising substituents for dye (substituent X – species, for instance, in present claim 1). Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Species Group II

Claims 1-2, 4, 6, 9-11, 13-14, 18-25, 27-28, and 32-37 are generic to a plurality of disclosed patentably distinct species comprising substituents for dye (substituent B– species, for instance, in present claim 1). Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Species Group III

Claims 19 and 33 are generic to a plurality of disclosed patentably distinct species comprising substituents for group comprising a fade preventing group for the dye residue (group

G). Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

5. Applicant is required under 35 USC 121 to elect a single disclosed species from each aforementioned group, i.e. pick a single group, for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

6. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. A telephone call was made to Marshall Chick on 12/2/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Callie E. Shosho whose telephone number is 571-272-1123. The examiner can normally be reached on Monday-Friday (6:30-4:00) Alternate Fridays Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan can be reached on 571-272-1119. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
